Strigo
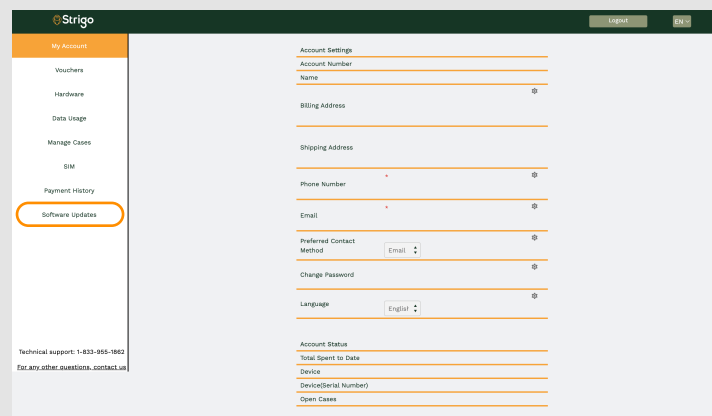

1 **Connect to a broadband Wi-Fi network and login to your My Account**

**2** **Choose the "Software Updates" link on the left**

*You might experience a pop-up block. To authorize the download, click on the window icon on the right of the address bar of your browser.

3 **Turn your Strigo device on and connect to the STRIGO-xxxxx Wi-Fi network**

**4** **Log in to the router page by entering 192.168.128.100 in the address bar of your browser**

5 **From the homepage, choose "Support"**

6

Scroll down to "Update Terminal Software" and choose "Browse" to select the previously downloaded terminal software package

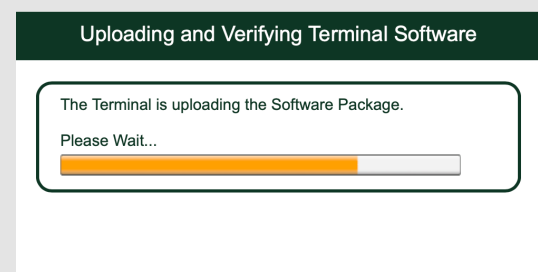

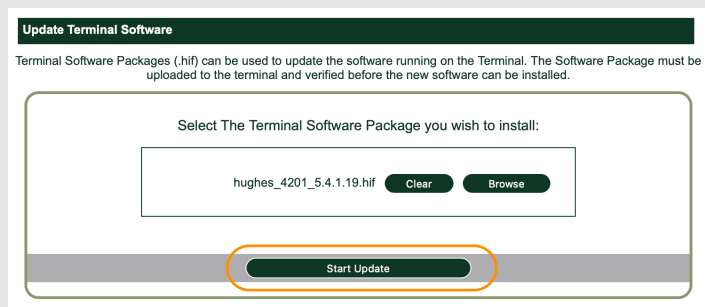

7

In the file explorer window, choose "Terminal Software Package" and select "Upload"

8

Click "Start Update" to upload software package to the terminal

A pop-up will display progress.

9 When the upload is complete, the new page will display the software update to come

Confirm that this new version is indeed newer than your current version.

Update Terminal Software

Terminal Software Packages (.hif) can be used to update the software running on the Terminal. The Software Package must be uploaded to the terminal and verified before the new software can be installed.

A Terminal Software Package is ready to be installed:

Component	Current Version	New Version	Progress
Terminal Software	5.2.2.7	5.4.1.19	Pending

Install   Cancel

10 Click "Install" to proceed
