# Strigo

Web User-Interface Guide
As easy as 1, 2, 3, Strigo

Strigo is supported by a web-based application interface that helps you monitor and configure your network preferences. To access Strigo's WebUI, connect to Strigo's Wi-Fi network and enter the IP address 192.168.128.100 in your web browser.
Here are three popular ways to use your WebUI.

Access network settings

1 Connect to Strigo Wi-Fi and enter IP address in browser.

1:00
1 ▲ 192.168.128.100

2 Use satellite pointing aid to optimize signal strength.

Antenna Pointing Mode

Please point the terminal's antenna in the direction and the angle of the satellite.
Click the button below to register when good signal quality is being received.

Signal Strength:
53%
Enable Audio
3 Register with Network

3 Register with network to enable data connection.

Attaching...

The Terminal is currently attaching to the Strigo network. Please wait...
